

MANUFACTURER'S DECLARATION

REACH use restriction of diisocyanates - training

Recticel Insulation hereby confirms that it is mandatory for anyone who comes in contact with free isocyanates in concentrations $>0.1\%$ by weight must be trained by August 2023 according to REACH use restriction of diisocyanates.

Because our cured product does not contain any (free) isocyanates ($>0.1\%$), it is not necessary for people using our insulation boards (customers, installers, ...) to follow a specific training on the use of diisocyanates.
